Location:

Adeje is the sixth largest municipality in Tenerife and is located in the southwest of this island. Originally, Adeje was just a small village - today it is one of the most important holiday destinations in Europe because of the great beaches, theme parks and various leisure activities such as golfing and diving, but also because of the many hiking trails and impressive landscapes. More than 45% of the municipality's area is made up of nature reserves and there are also 14 beaches of all sand colours where you can swim all year long thanks to an average annual temperature of 24 °C and almost 300 days of sunshine a year. If you take a boat trip, you can watch whales and dolphins, as the region is one of the world's most important whale habitats.
