This architectural elevation drawing shows a two-story building facade. The upper story is white and features three rectangular windows. The lower story is dark green with vertical stripes. A staircase is visible on the left side of the building.

This architectural drawing shows a side elevation of a building. The main structure is a long, low rectangular volume with a flat roof. It features two identical rectangular windows positioned symmetrically along its top edge. To the right of this main volume, there is a vertical section, possibly a staircase or a narrow tower, characterized by a series of horizontal lines indicating steps or floor levels. The drawing is a simple line sketch on a light background.
